Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Silverbrook et al. (US 6775513).

Silverbrook et al. teaches a printer cartridge for an inkjet printer (figure 1, element 1) including: a printing fluid storage (figure 3, element 8); a pagewidth printhead (figure 3, element 4) in fluid communication with the printing fluid storage (figure 4, elements 20a,b,c,d); and a shield (figure 1, element 5) extending the length of the printhead arranged to protect the printhead from contact with paper (figure 1, element 2) upon insertion of the cartridge into a cradle of the inkjet printer, and further including an elongate body (figure 3, element 25) housing the printing fluid storage and adapted to be received within the cradle of the inkjet printer.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 2853

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Silverbrook et al. (US 6775513) and Silverbrook (6893109).

Silverbrook et al. teaches a printer cartridge for an inkjet printer (figure 1, element 1) including: a printing fluid storage (figure 3, element 8); a pagewidth printhead (figure 3, element 4) in fluid communication with the printing fluid storage (figure 4, elements 20a,b,c,d); and a shield (figure 1, element 5) extending the length of the printhead arranged to protect the printhead from contact with paper (figure 1, element 2) upon insertion of the cartridge into a cradle of the inkjet printer, and further including an elongate body (figure 3, 2 element 5) housing the printing fluid storage and adapted to be received within the cradle of the inkjet printer. However, Silverbrook et al. does not teach the shield acting as a cover plate to seal an air duct of the printer cartridge.

Silverbrook teaches the shield acting as a cover plate to seal (figure 7, element 36) an air duct (figure 7, element 41) of the printer cartridge.

It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the invention of Silverbrook et al. with that of Silverbrook in order to protect the printhead from damage.
